RE: Approval letter for Ruby Pit Site Development Plan

Mr. Bobrowski:

On September 12, 2006, the Dripping Springs City Council approved the proposed site development plan for the "Ruby Pit" and its included improvements. There were also the conditions of making sure that the back-up "beepers" are turned off – unless there is another agency or authority that requires that they be turned on for safety purposes. If so then the City would ask that they are kept to the lowest decibel allowed. Further, there was also the request for the blasting data that was offered showing the results of how often and the results from the blasts. Please consider this letter as the official confirmation of this vote, and the clearance from the City to move forward with the construction of the improvements.

Please keep us informed to any proposed changes that may need to be done in the future, and also keep up the maintenance of the shown erosion control measures that were shown in the site development plan. The City's inspector, Billy Eubanks, will on occasion be coming by for a site visit; he will not be announcing when he will be coming.

If there are any questions regarding this matter, please contact me at your convenience.

Best regards,

Jon Thompson  
Development Coordinator
